

GO - TO - MARKET STRATEGY

CORE THESIS

To cater to the nutrition gap among pregnant & lactating women and infant & young children.

THESIS METHODOLOGY

Leveraging CSR-funded free distribution through NGO networks to establish trust across rural India and becoming a trusted choice in urban households through online and offline channels, our mission is to deliver the right nutrition at the right time while creating measurable social impact at scale.

Multichannel Sales

- Online Sales in Strata 1
- Offline + Online Sales in Strata 2
- CSR Funded NGO Distribution + Offline Sales in Strata 3 & 4

Trust-Led Distribution

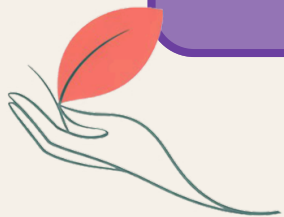

CSR- Funded NGO Distribution Across Strata 3 & 4 Markets

Margin- Led Distribution

Attractive Margins Across the Distribution Ecosystem

Tech-Driven Approach

- Whatsapp Chat bot Engagement for Strata 3 & 4
- Website + Mobile Application for Strata 1 & 2

Unit Economics & Pricing

Covered in This GTM Deck

- Distribution chain margin % (Our SP → SS → Distributor → Retail → Customer)
- Margin structure across all 5 product categories: Pregnancy, Lactation, Infant Formula, Infant Nutrition & Child Powder
- Channel mix (CSR vs. Retail) by strata and by year
- Revenue contribution share by product category (Year 3)

Detailed in Financial Projections

- Selling price (SP) per SKU, by strata and brand tier
- Per-unit COGS and gross margin after full distribution chain payout
- Revenue projections (absolute ₹) by year, category, and channel
- Breakeven timeline and capital deployment schedule across both funding tranches

YEAR 1: GO-TO-MARKET STRATEGY

Q1	Q2	Q3	Q4
R&D Setup - Formulation - Testing - Trials Sales & Tech - Sales Team Training (Strata 3 Retail & NGO) - Sales Activation - Mobile App Development - WhatsApp Bot for Consumers	Ground Activation - Train ASHA & Anganwadi Workers - Establish Chemist & Hospital Relations - NGO Network Setup - Events & Fun Activities - Education Drive	Expansion - Scale using Q1 & Q2 Strategies for new areas in Maharashtra. Research - On-ground research of future expansion regions beyond Maharashtra	Expansion - Scale using Q1 & Q2 strategies for new areas in Maharashtra Research - On-ground research of future expansion regions beyond Maharashtra

**From the second tranche of funds, we will start setting up our own plant for Y2 production (takes 9 months).

YEAR 1

MAHARASHTRA

Expanding Access Via NGO Networks
& Retail Presence In Strata 3 & 4

BRAND - C (3 SKUs)

Pregnancy Nutrition (Garbhika)

Lactation Nutrition (Matrusneha)

Child Nutrition (Little Vita)

R&D for Strata 1 (BRAND - A)

Pregnancy · Lactation · Child Nutrition · Infant Nutrition ·
Infant Formula Milk

1,04,385 Total Mothers

32,720 Total Babies

YEAR 1
POPULATION SERVED

Pregnant Women

52,171

Strata 3 & 4

Lactating Women

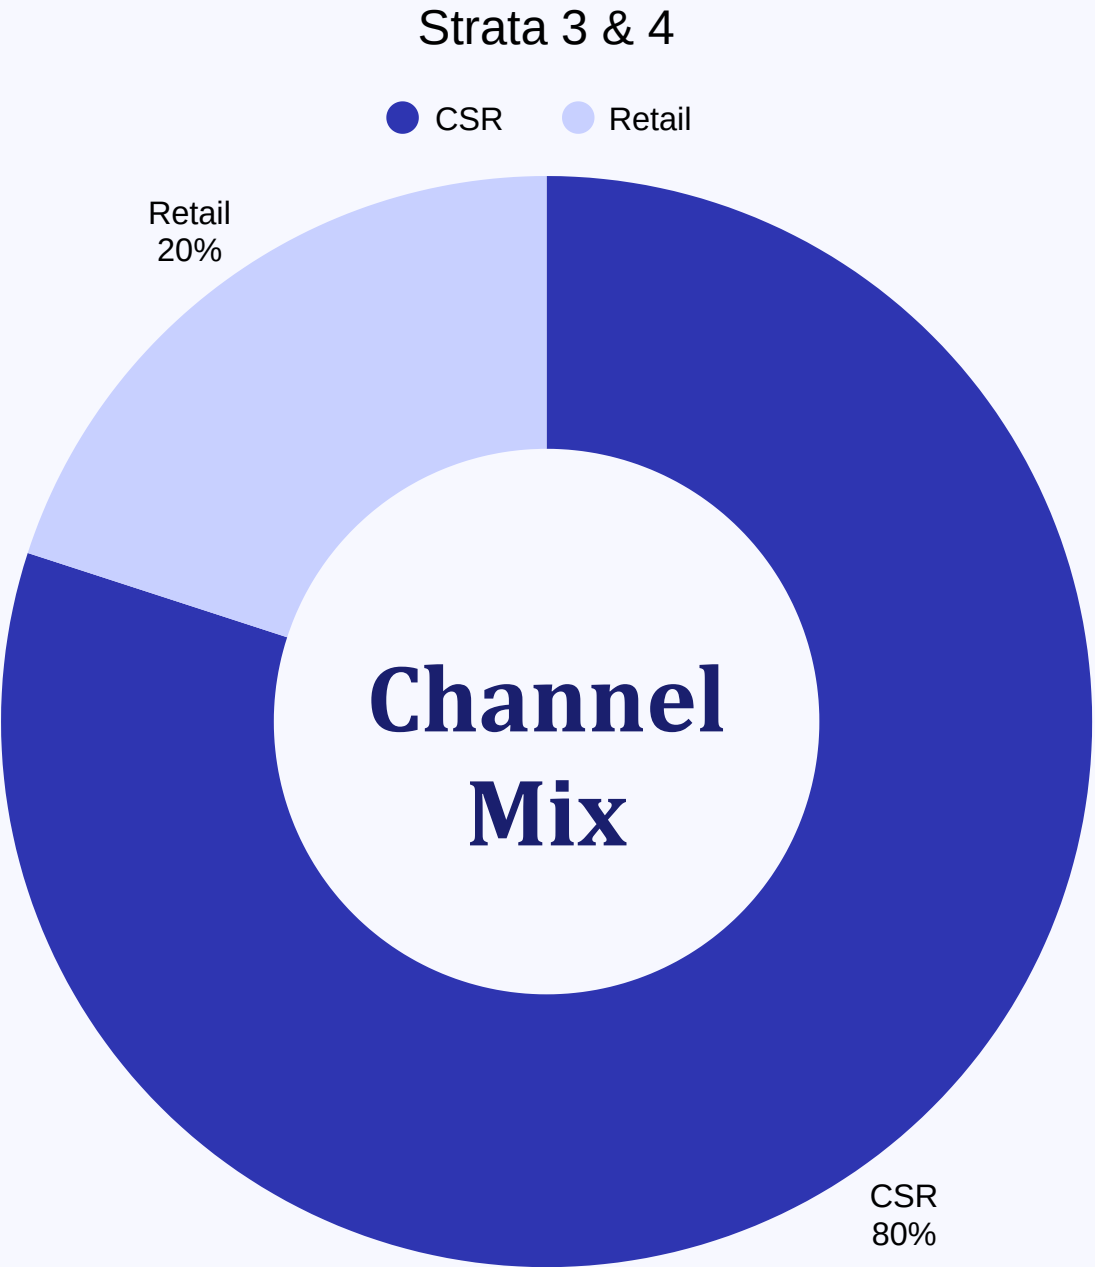

52,214

Strata 3 & 4

Children (2–6y)

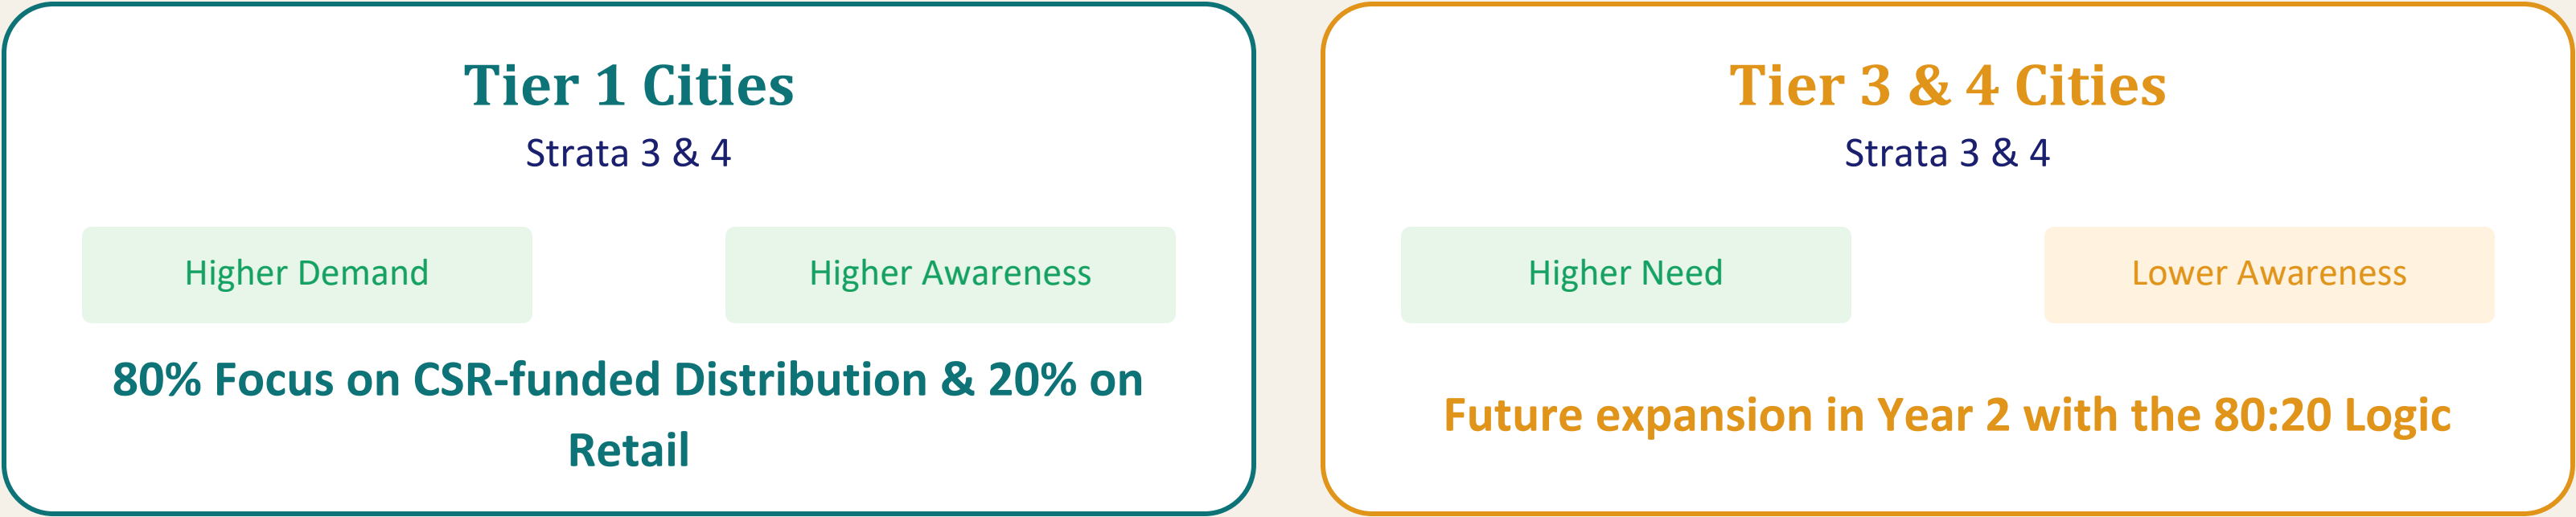

32,720

Strata 3 & 4

80:20 Bifurcation Reason

Strata 3 & 4 in Tier 1 Cities is an aspirational segment. They don't just buy products on their own but also influence purchases around them.

Strata 3 and 4 consumers are characterized by their aspirational nature, making them our primary focus for the go-to-market strategy. We'll start our distribution in Tier 1 cities' Strata 3 & 4 and plan to expand into other Tier cities and states with the same strata as our point of entry in the market, as they will have higher demand and population density.

Year 2: Actions & Milestones

Quarterly execution plan for multi-state expansion

Q1

- Venture out of Maharashtra into Tier 3 States.
- Training ASHA & Anganwadi Workers.
- Establish relations with Chemists & Hospitals.
- Connect with CDPO & ICDS for new states.
- Sales Team Training for Strata 3 Retail & NGO.
- Sales Activation.

Q2

- Training ASHA & Anganwadi Workers in new states.
- Establish relations with Chemists & Hospitals.
- NGO Network Establishment.
- Activation Events & Fun Activities.
- Education Drive.

Q3

- Expansion of areas using Q1 & Q2 strategies.
- On-ground research of future expansion regions.

Q4

- Expansion of areas using Q1 & Q2 strategies
- On-ground research of future expansion regions

From the second tranche of funds, own plant setup begins for Y2 production (9-month timeline)

YEAR 2

Beyond Maharashtra

Strata 1 Market Launch and Further Expansion In
Strata 3 & 4

Total SKUs by Category

Category	Brand A (Strata 1)	Brand C (Strata 3 & 4)
Pregnancy Nutrition	3	1
Lactation Nutrition	1	1
Infant Complementary Food	2	1 or 2
Child Nutrition	1	1

Newly Launched Already Active

3,71,534 Total Mothers

2,32,870 Total Babies

- By Year 2, we aim to reduce our dependence on contract manufacturers, which will significantly increase the number of mothers and babies affected by our initiatives.

Our sales strategy will persist with a focus on Strata 3 and 4, while minimizing reliance on CSR distribution, targeting a distribution model of 75% CSR and 25% direct sales.

- In Strata 1, we will be focusing exclusively on online sales, as most consumers in this segment purchase products online.

Result: Significantly higher impact on mothers & babies across markets

From the second tranche of funding, we will initiate the establishment of our own facility for Year 2 production, which will take approximately nine months to complete.

Own Manufacturing Plant Setup Begins

YEAR 2
POPULATION SERVED

Pregnant Women

1,85,213

Lactating Women

1,86,321

Infants 6–24m

1,99,445

Children (2–6y)

2,32,870

YEAR 3

All Stratas

National distribution across
all tiers & channels

BRAND - A , B & C

STRATA 1

Online (Website, E-Commerce, Meta, Google, Influencers, KOLs)

STRATA 2

STRATA 3 & 4

CSR Funded Distribution via NGO & Retail (High Trade Margins)

6,50,760 Total Mothers

6,49,338 Total Babies

YEAR 3
POPULATION SERVED

Pregnant Women

3,24,365

Lactating Women

3,24,973

Children (2–6y)

4,05,960

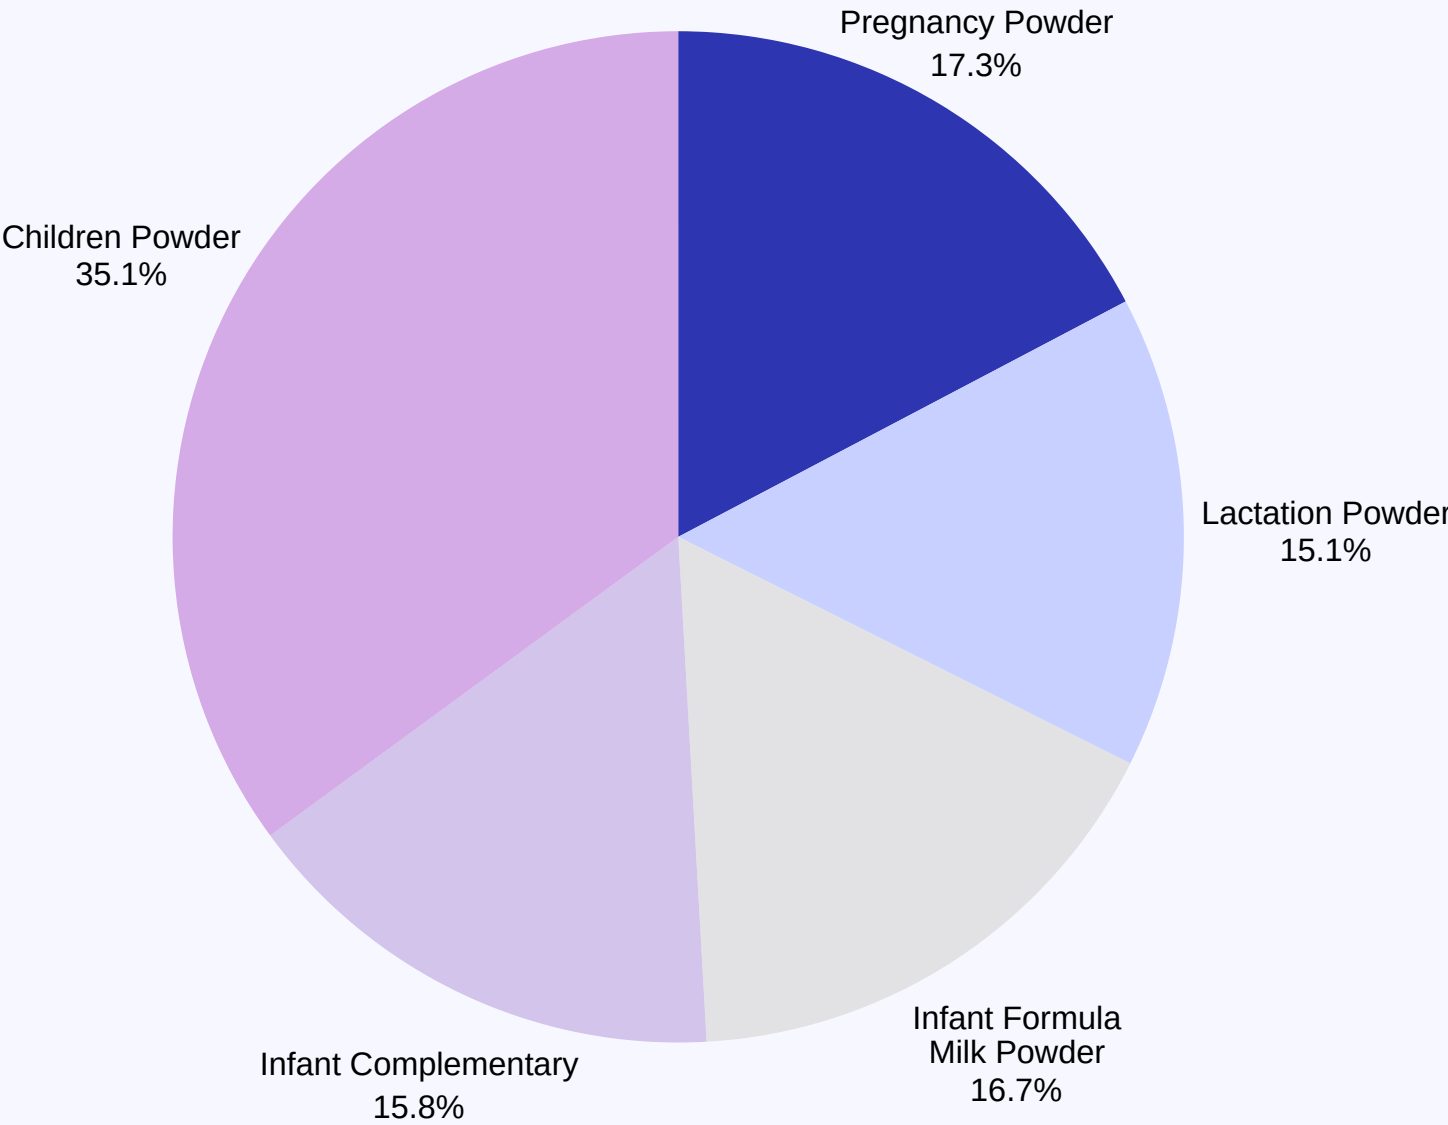

Infants 0–6m

2,44,800

Infants 6–24m

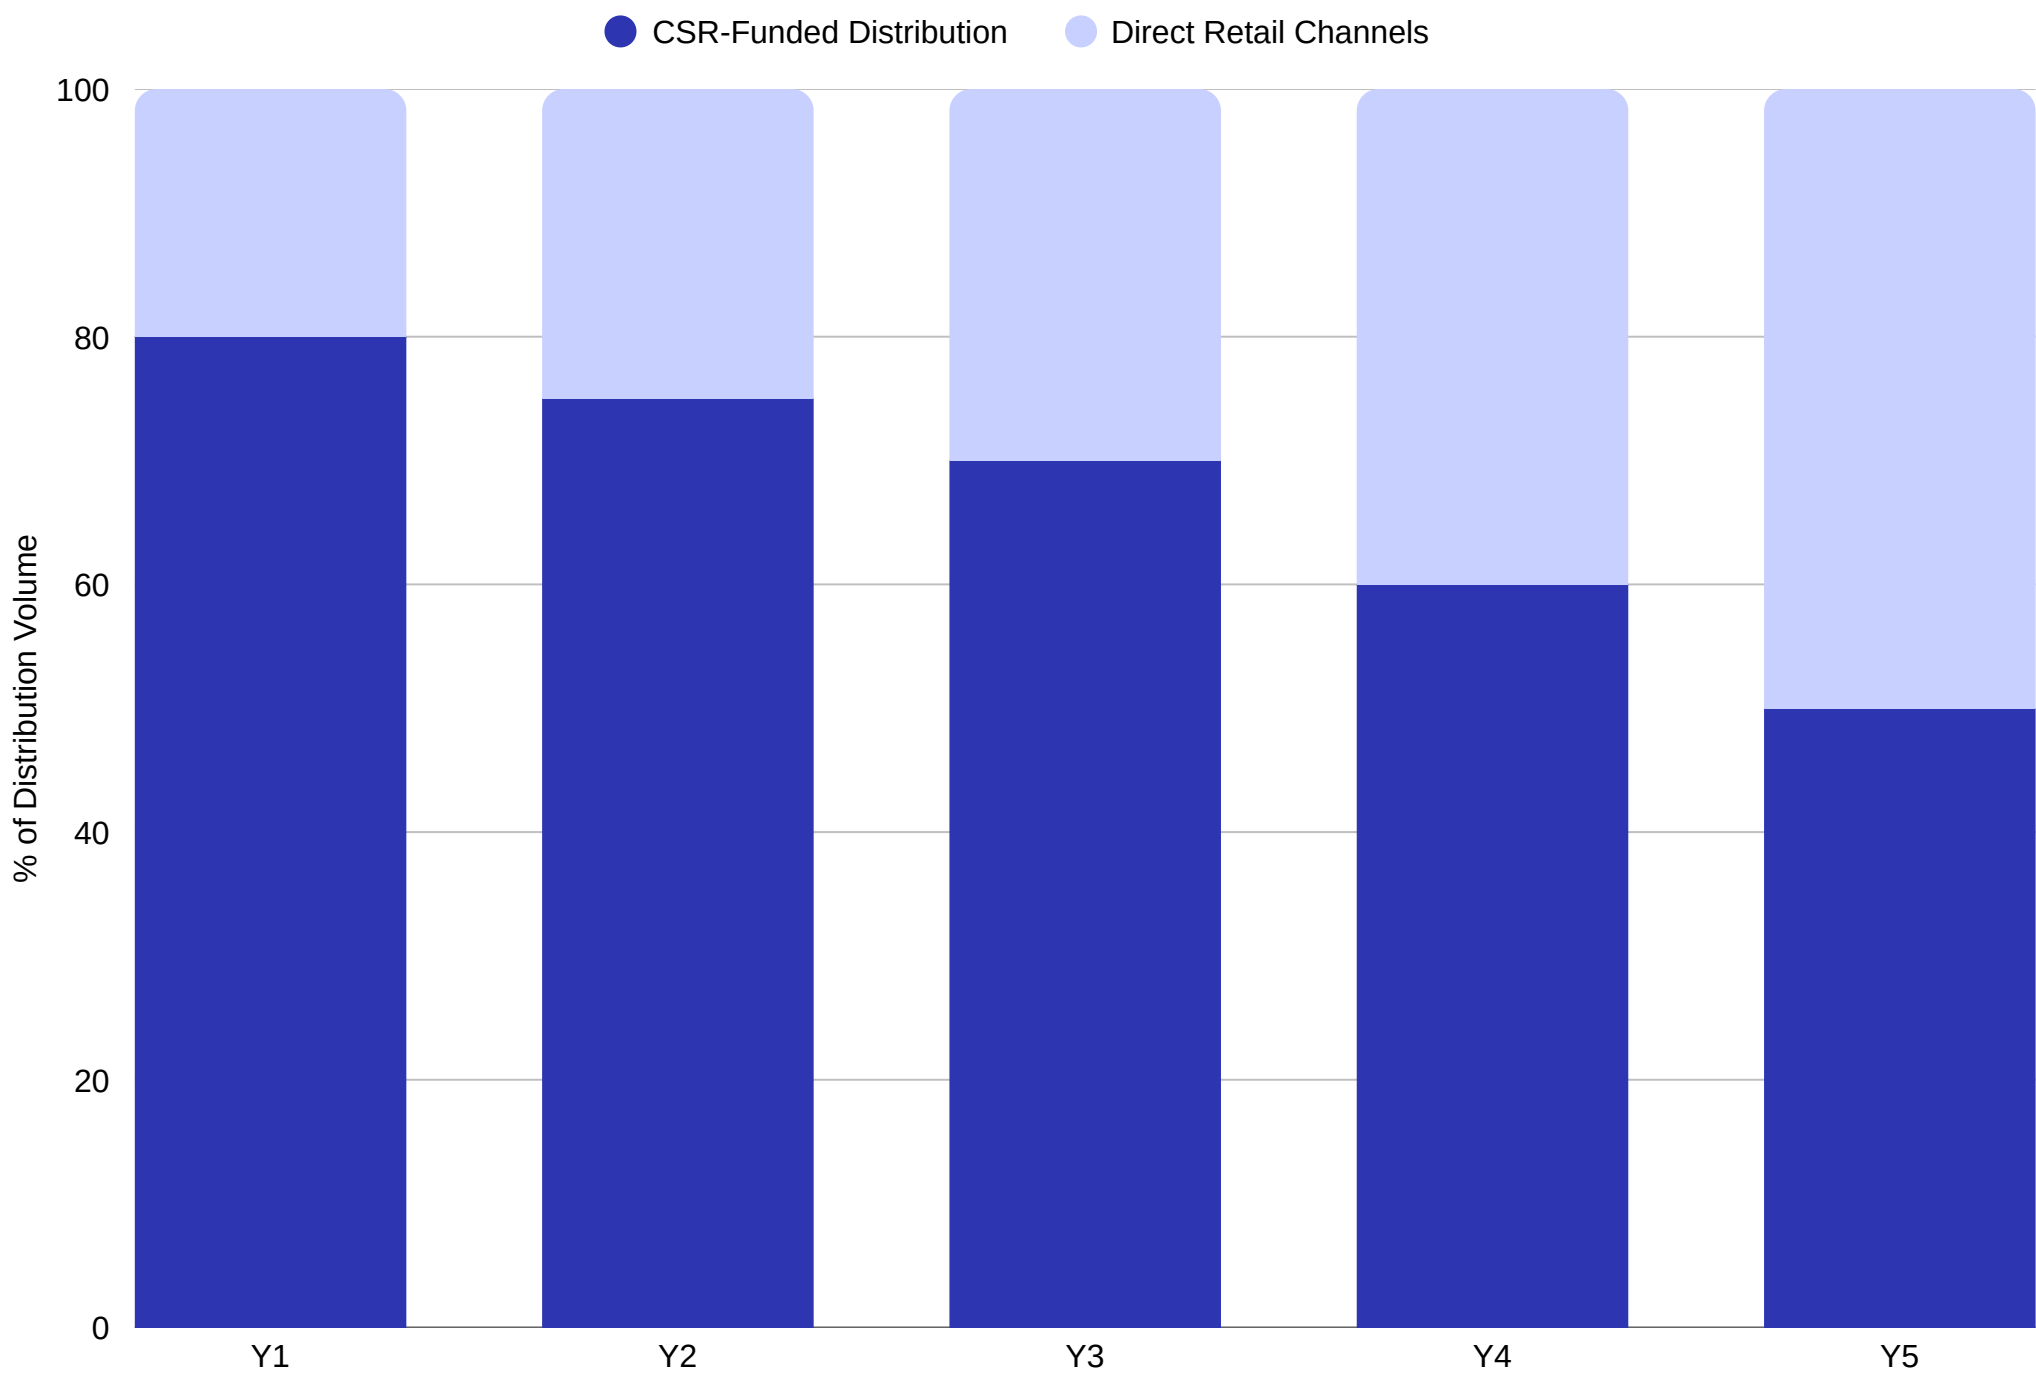

2,44,722

Revenue Channel

CSR De-Risking Trajectory

Reducing distribution dependence on CSR funding as direct & alternate channels scale

Why CSR Share Declines

- Trust established in Year 1-2 via NGO networks converts into paid retail demand in the same geographies
- Own-manufacturing (from Tranche 2) lowers unit cost, making direct retail margins viable at Strata 3 & 4 price points

Diversifying Beyond CSR

- Retail & e-commerce scale-up in Strata 1 & 2 (Year 2+) reduces overall portfolio reliance on subsidized distribution

CSR is the entry wedge.
By Year 5, the majority of volume shifts to direct & alternate channels, derisking the business from third-party CSR budget cycles.

Distribution Chain Margins

All products across Tier 1, 2 & 3

Pregnancy Powder			
Distribution Chain	Strata 1 (Wonder Womb)	Strata 2 (Matrunayana)	Strata 3 & 4 (Garbikha)
	Margin %	Margin %	Margin %
